

Note: This module is wired as a DCE. Connect to a DTE using a straight through cable.  
 Data transmitted from a DCE to a DTE is on the signal named RXD  
 Data transmitted from a DTE to a DCE is on the signal named TXD  
 J1-Pin 3 is an output. It carries data received from the DTE  
 J1-Pin 4 is an input. It carries data transmitted to the DTE

For more information on the parts used in this design, please refer to:
